Turkish Green Crescent

Candidate for:  
**Deputy Treasurer**

My name is Alexandre Kieslich da Silva. Since 2016 I work as an addiction psychiatrist in Porto Alegre, Brazil.

Currently, I am working at my private office and I am teaching at the medical school at the University of Taquari Valley.

I have been actively participated in conferences and field work on drug use. At the time, I am the president of Conectados Pela Vida.

As psychiatrist I am interested in finding new ways to improve the sustainability of the wellbeing of the community especially for the new generations.

In the board I don't see anybody from our South America in last terms. I think regional balance is crucial, because we have various public policy issues in South America, especially in drug policies and these policies are open to improvement in a perspective that values sustainable development goals. Moreover, I'll be in collaboration with my regional cso contacts to increase the number of members in South America.

My academic background was based on leadership and I am wishful to collaborate with my academic background as I am working and researching addiction since 2016, so I think I could enrich the team about drug policies.
